

SHOE PARTY INSTRUCTION

WWW.SOLEHOPE.ORG

STEP ONE TRACING

- Trace on the back (inside) of the material (so your marks don't show through on the front).
- Trace 4 vamps, 4 heels, 2 heel patches on denim and 2 heel patches on plastic (12 pieces, one pair).
- Make sure you trace carefully! If the pattern moves, the size will be off.
- Do NOT trace on the pockets, seams, or zipper.

STEP TWO CUTTING

- Cut your denim patterns OUTSIDE the line. The edge of your scissors can touch but should not break the traced line.
- Cut your plastic pattern pieces ON the traced line.

STEP THREE ASSEMBLING

- Label the plastic heel pieces with the size of the shoe in permanent marker. Put the size ONLY on the plastic pieces.
- Place all 10 denim pieces together, and pin them with the plastic pieces with one large safety pin. Each pinned set will make pair of shoes, and each set should have 12 total pieces, 10 denim and 2 plastic.
